

Mohammad Askan Riyaz Ahmed Ladji

Android & Java Developer | SDK Developer | Kotlin | Core Java | Jetpack Compose

✉ askanladji20@gmail.com ☎ 8208901884 📍 Pune, India 🌐 Portfolio 🌐 LinkedIn 🌐 GitHub

👤 PROFILE

Android & Java Developer with hands-on experience in designing, developing, and maintaining scalable Android applications and Java-based business logic systems. Strong expertise in Core Java, OOP concepts, REST API integration, multithreading fundamentals, and Android SDK development using Kotlin and Java. Proven experience working on enterprise-grade transaction systems, SDKs, CRM applications, and device-level integrations. Adept at clean architecture, performance optimization, secure data handling, and agile development practices.

📁 PROFESSIONAL EXPERIENCE

Android Developer (Present)

Nstore Retech Pvt. Ltd.

03/2025

Thane, India

- Developed and maintained core banking and CRM Android apps using Kotlin, XML, and Jetpack Compose.
- Migrated legacy Windows CRM modules to Android, building new UI and backend components.
- Created Android SDKs for partner integrations and device control functions.
- Worked on MDM (Mobile Device Management) system for enterprise-level Android control and security.
- Implemented API integrations, Room DB, and data synchronization using clean MVVM architecture.
- Collaborated in agile teams with Git versioning, CI/CD, and code reviews.

Executive (Java Developer)

AGS Transact Technologies

06/2024 – 03/2025

Mhape, Navi Mumbai

- Developed custom Android modules integrated into internal transaction and automation systems.
- Built and consumed REST APIs, optimized app performance, and managed business logic in Java.
- Created UI flows, fragments, and services aligned with Android best practices.
- Enhanced debugging, crash reporting, and performance profiling across multiple app modules.

Software Developer Intern

AGS Transact Technologies

09/2023 – 11/2023

Mhape, Navi Mumbai

- Developed cross-platform applications using Flutter (Dart) with backend integration.
- Worked on Java-based Android modules during Android-to-Flutter migration processes.
- Assisted in implementing authentication, Firebase integration, and real-time data synchronization.

🎓 EDUCATION

B.E. in Computer Engineering

Watumull Institute Of Electronic Engineering And Computer Technology

12/2021 – 05/2024

Mumbai, India

- Specialized in software engineering principles, advanced algorithms, and system design methodologies.

Diploma in Computer Engineering

VPM's Polytechnic

05/2018 – 06/2021

Thane, India

- Developed a strong foundation in programming, database systems, and application development.

- Understand the concept of mathematics and science.

SKILLS

Programming Languages:

Kotlin, Java, Dart, SQL

Java Expertise

Core Java, OOP Concepts, Collections Framework, Exception Handling, Multithreading Basics

Development Tools:

Android Studio, ADB, Gradle, Git, GitHub

Architecture:

MVVM, Clean Architecture, Dependency Injection (Hilt/Dagger)

Database Expertise:

Room, SQLite, Firebase Realtime DB, Firestore

Version Control:

Git, GitHub, Bitbucket

Design & Prototyping

Figma, Adobe XD, Canva

CERTIFICATES

Android Development (Udemy):

Mastered app design, Kotlin, Jetpack, and API integration.

Full Stack Java (Apna College)

Mastered complex Java functionalities.

Advanced Python Programming (Udemy):

Mastered complex Python functionalities for automation and data analysis.

SQL for Data Analytics:

Specialized in advanced SQL query development and analytics.

PROJECTS

Comico: Comic Book App

- Designed an app to purchase, read, and stream comics with advanced caching and multimedia integration.
- Built with Kotlin, Jetpack Compose, and REST API integration for dynamic content loading.

Mental Health Assessment Tool

- Developed a cutting-edge AI-based platform utilizing advanced GNN and CNN models to assess mental health via image uploads.
- Achieved high accuracy in evaluations, complemented by an intuitive and user-friendly interface for seamless interactions.

Expense Splitter App

Flutter, Dart, Provider, Firebase

- Designed real-time expense sharing app with Firebase and state management.

ACHIEVEMENTS

- Represented institute in Smart India Hackathon 2023 with a recognized high-impact Android project.
- Winner of CodeVengers Hackathon, leading Android team under strict timelines.
- Recognized at AGS for developing reusable SDK modules improving development speed.
